FEATURED PROJECTS

MAMA MILK WEBSITE

React / Redux, JSX, Node.js, CSS, MongoDB, GraphQL, and Strapi

A commissioned lifestyle site built with React to utilize reusable components and a fast, interactive UI that will work seamlessly on all types of devices. juliehawn.com/work

GAME OF THRONES DIGITAL PLAYING CARDS

React, JSX, Node.js, CSS, GraphQL , AWS AppSync, and Amazon S3

An AWS hosted API queried with GraphQL to generate Game of Throne character playing cards designed with JSX and CSS Flexbox. juliehawn.com/work

SAN DIEGO JAVASCRIPT APP

React Native / Redux, Node.js, MongoDB, Loopback, Stripe, and Expo

Worked with a team of 5 and a SCRUM master to debug and make additions to a JS Meetup group's mobile app. My specific task was to create the donation feature which captured credit card information then charged the card through the Stripe API. I also debugged the sign up feature so it prohibits users from registering if the email address already existed in the database.

OCA PORTAL

React / Redux, Bootstrap, Node.js, MongoDB, and Loopback

Collaborated with a team of 5 and a SCRUM master for a 1 week sprint to enhance and debug a Hired.com for coding academy graduates and employers. My task was to build a feature that allowed users to edit/delete their work and education history. The user's changes are then updated in the database through an Axios request.
